

QUALITY AND ENVIRONMENTAL POLICY

The General Management expresses the **Quality and Environment Policies** during management meetings. They are periodically revisited and discussed also with a view to establishing how to apply them, to evaluate the resources involved and to ascertain the continued suitability of what has been expressed over time. In general, they are:

- **Provide** the Organization with the means and resources to create products with high technological content to acquire economically and technically rewarding markets.
- **Carry out** risk analyses and monitor their improvement.
- **Optimize** production processes in line with needs
- **Achieve** maximum efficiency and reduction of waste, scrap, and rework.
- **Involve** all suppliers to obtain their maximum collaboration and involvement in the successes of AIRAGA RUBINETTERIE S.p.A.
- **Pursue** Compliance with International Approvals products.
- **Pursue** maximum customer satisfaction.
- **Pursue** the satisfaction of customer requirements.
- **Pursue** continuous improvement of the effectiveness of the Quality and Environmental Management System.
- **Pursue** and maintain legislative compliance for all environmental aspects.
- **Optimize** processes to reduce direct and indirect environmental impacts.
- **Plan and carry out** the necessary environmental training for staff.
- **Maintain** compliance with the UNI EN ISO 14001:2015 Environmental Management System Standard
- **Promote** better communication in order to involve all company levels
- **Plan and implement** fire risk containment actions by increasing controls
- **Pursue** the improvement of energy production from renewable sources
- **Pursue** the protection of the environment and the prevention of environmental pollution

The Policy set out above is of a **general** nature and outlines the company in its configuration. Other Policies are stated and detailed by the Management from time to time, according to needs, the evolution of the market and technologies. They are transmitted within the Organization using suitable internal communication means.

The Policy expressed by the General Management means that each of us must operate in the Company in the interest of product quality and this occurs by respecting the assigned tasks and responsibilities, the technical and commercial documentation, the drawings and procedures, the production cycles and ' more expected. To achieve the set objectives, the General Management makes available all the necessary resources in terms of adequate machinery and systems, adequate structure, measuring instruments, staff training and organisation.
